

HELLO MOSMA

COMFORT ALWAYS

<https://www.hellomosma.com.au>

HELLO MOSMA

▶ 1 MOTOR ▶ 2 MOTOR ▶ 4 MOTOR ▶ PUSHBACK ▶ PULL LEVER

what's the difference

- **Single motor** chairs move the back rest and leg rest at the same time.
- **Twin motor** chairs allow the backrest and leg rest to move independently of each other, typically allowing for a greater degree of leg elevation and greater degree of recline compared to a standard single motor chair.
- **Quad motor** chairs allow independent movement of backrest and footrest , allowing for the 4 direction of move around with mobile wheels
- **Pushback** chairs simply adjust your body weight back and the integrated footrest extends effortlessly.
- **Pull Lever** chair provide effortless reclining at the pull of the lever
